

SAYAN JANA

DATA ANALYST | BUSINESS ANALYST

PROFILE SUMMARY

I am a detail-oriented analyst seeking to transition into the field of data science, with 2+ years of web and graphic design experience. My design background has helped me in creative problem-solving, visual communication, and collaboration skills. I have interest in Power BI, SQL, Excel, R, and Python, along with hands-on experience in exploratory analysis, data visualization, and predictive modeling. I am passionate about extracting insights to help in making strategic decisions and bring a strong background in continuous learning and solution-focused thinking to data-driven initiatives.

EXPERIENCE

Business Analytics Intern

Labmentix - (Sept, 2025 - present)

Project-based data analysis involving data cleaning, preprocessing, insight generation, and trend identification. Developed clear, intuitive, and interactive dashboards to support data-driven decisions.

WEB DESIGNER

The Business Research Company - (Oct, 2022 - Sept, 2023)

Designed and developed responsive, user-friendly, and visually appealing websites aligned with company branding using HTML, CSS, Bootstrap, and JavaScript. Optimized site performance and loading speed by leveraging Google Analytics and GTmetrix to identify and resolve bottlenecks.

GRAPHICS DESIGNER

Alteus Biogenics Pvt. Ltd. - (Nov, 2020 - May, 2022)

Created a variety of design materials—including business cards, folders, banners, pamphlets, and social media creatives—while maintaining consistent and high-quality brand visuals.

PROJECTS

Data Analysis Projects:

- Ola Insights Analysis - PostgreSQL, Python, Pandas, Streamlit, Power BI, DAX**

An end-to-end data analytics project that analyzes ride-booking data using SQL, Python, Streamlit, and Power BI. The project uncovers key insights on revenue, cancellations, customer behavior, vehicle performance, and incomplete rides, combining interactive SQL-driven analysis with executive-level dashboards for business decision-making.

- IPL Data Analysis - Tools: Power BI, Power Query Editor, DAX**

This Power BI-based IPL analysis visualizes key metrics like team performance, player stats, toss decisions, and venue trends to deliver clear, data-driven insights.

- Housing Market Data | Capstone Project - Tools: Excel**
A Regression Analysis Model for the Market Value of Housing Units (using data for Year 2013)

- Bike Sales Data - Tools: Excel**

Bike Sales Analysis is a hands-on data analysis project that explores sales trends in the biking industry.
